

# Animal Adaptations

## STUDENT PAGE 3

### DRIVING QUESTIONS

What physical and behavioral adaptations do animals have and how do those adaptations serve as survival strategies?

### OBJECTIVES

I will explore different behavioral animal adaptations and how they help animals survive.

### MATERIALS NEEDED

- [Guiding Questions](#) for students to use in the project type of their choice.
- [Project Choice Board](#) — Grade 1 and [Project Choice Board](#) — Grades 3-5, LS and BIO

### ACTIVITY

Using the resources or observation data from activities and resources in Part 1 (and 2), you will create a product showcasing your understanding and research of physical and behavioral adaptations for an animal of your choice in this project based learning opportunity.

You can flip the above activity so you pick an adaptation and give examples of animals that all have that adaptation or exhibit a similar behavior. For example, you may want to explore night vision or other adaptation for moving around in the dark in nocturnal animals.

Let your interest in this topic guide you.
